

# Vendor Questions with Answers

<b>District:</b>	<b>Meridian Library District</b>
<b>RFP/470 Number(s):</b>	<b>170074441 and 170074468</b>
<b>Initial Posting:</b>	<b>April 10, 2017</b>
<b>Update History:</b>	<b>April 11, 2017</b>
<b>Last Day for Questions:</b>	<b>Per RFP and Form 470</b>

**Q1. What is the bandwidth dedicated to the VLAN between each library location?**

R1. We believe this is answered in the Form 470.

**Q2. Is there a VLAN between each location or is there a VPN?**

R2. We don't understand the relevance of this question.

**Q3. Are the 2960X-STACK modules going to be used for stacking existing 2960X switches? Will they be used to convert individual switches to a single stack of 3? Or will these modules be used in multiple sites?**

R3. The 2960-x stacking modules will be installed in the three switches that are currently installed in our main communications closet. They will allow us to create a single stack of 3 switches.

**Q4. Are the ISR 4331s an upgrade to existing Cisco routers? If not, what type of device are they replacing?**

R4. They will be replacing existing cisco routers.
